

## INFINITY T25

**The new wall cladding solution proposed by Ghizzi&Benatti is called T25, as it is made up of vertical slats measuring 25x25 mm.**

**This new G&B Infinity System is the ideal solution for enhancing the home decor, as this perfect cohesion between doors and wall panels allows you to realize unique and high-style environments.**

Infinity System is a wall cladding boiserie made of flush facing panels and swing doors: when doors are closed the entire system is a continuous wooden cladding without any visible fitting.

Infinity System is made on demand for any specific project and doesn't need any changing on already existing walls.

It's available in a wide range of wooden finishes and different design, such as this new impressive slatted cladding.

**Contact us for more information about G&B Collections!**
